Education and Enterprise Training

Why Choose Magic EdTech's Simulations?

We turn complex skills into measurable proficiency with high-fidelity XR that ships fast, scales easily, and stands up to scrutiny.

Proven impact

Instrumented scenarios with scoring and analytics to show faster time-to-proficiency and fewer errors.

Scale & adoption

VR and desktop delivery with SSO and ready-to-use enablement materials to drive high usage from day one.

Speed without lock-in

Modular components, reusable assets, and LTI/xAPI integration so you launch quickly and keep ownership

Trust by design

Privacy-safe data flows, safety/bias audits, and audit trails that satisfy compliance and stakeholder review.

Use Cases

Where does our immersive training deliver best?

Healthcare & Allied Health

Phlebotomy, sterile technique, and patient interaction. Safe practice without a physical lab.

Defence & Aerospace

Equipment maintenance, fault isolation, and mission rehearsal. Consistent, measurable results.

CTE & Higher-Ed

Robotics, advanced manufacturing, and electrical safety. Hands-on skills that meet standards.
