EdDataHub
A Solution That Gets Your Systems Talking

School Districts typically manage 20–50 systems. If you're still relying on spreadsheets and manual work, you're paying for it in staff time and missed deadlines.

Don't add tools. Start connecting them.

A Day Without EdDataHub

- "Why aren't grades syncing with attendance?"

- "Where's this student's IEP file?"

- "Why are there three versions of Jaime and no contact info?"

- "Wait—how did we miss the reporting deadline?"

- "Didn't we already pay for this integration?"

Imagine This Instead

Situation	With EdDataHub
The student enrolls on Monday	The record is pulled, matched, and standardized by Tuesday morning
Grades stop syncing	Self-healing integration detects, corrects, and sends an alert automatically
The State audit is announced	Reports, validation logs, and audit trails are ready and up-to-date
Identifying at-risk students	Real-time attendance + LMS data triggers early alerts for intervention
Missing funding reports	Cleaned and matched data ensures compliance submissions are on time and complete

EdDataHub

The integration & governance layer that keeps your systems connected, secure, and in sync.

Unified System Integrations
Seamlessly connects SIS, LMS, HR, transportation, and more via Ed-Fi, OneRoster, SIF

Automated Student Records Exchange
Pulls complete records from previous districts in minutes, not weeks (Ed-Fi + PESC)

Data Quality Engine
Nightly validation, deduplication, and issue flagging before problems go downstream

Compliance-Ready Reporting
Generates EdFacts/state formats with audit trails already built in

Governance & Access Control
Full FERPA/COPPA compliance with audit logs and access controls at every level

AI-Ready Data Annotation
Structures and enhances educational content to train and fine-tune AI learning models

What You Can Expect from EdDataHub

- **80%** reduction in manual file handling within Sem 1.
- **<5min** to pull a fully reconciled state report.
- **50% faster** interventions for at-risk students = measurable gains in attendance & achievement.
- **Zero license** lock-in: District retains full IP and data ownership.

What Makes EdDataHub Practical for District Teams

- Built on open education standards like CEDS, Ed-Fi, OneRoster, and SIF.
- The solution is modular. Roll it out in phases to match your district's priorities.
- You keep full control. You own the code, the deployment, and the roadmap.
- Pays for itself in fewer errors, faster decisions, and less time lost.
- Tailored to each district's environment & not a one-size-fits-all solution.

Your data problems aren't just frustrating. **They're expensive.**
